

The Japanese animated movie, 'Akira' and the more recent 'Ready Player One' film were the primary influences. This is the world's first Akira mobility scooter. We took the iconic shape and colour of the bike and gave it an extreme Cyberpunk makeover, retaining the youth street culture visuals, whilst subtly accommodating all the legal requirements of a class 3 invalid carriage.

Powered by a 450w electric engine. Metal chassis, aluminium sheet, and carved foam. Hand-crafted and scratch-built.

Key Features

Converts from electric bike to a fully functional class 3 invalid carriage.

Onboard drive computer

Sound system, heated seat

Neon wheel LED's.

Onboard drive computer, Satnav

This is the perfect opportunity to own a unique film-inspired prop from Podpadstudios. Fully working electric bike/invalid carriage. Ideal for a private collection or could be a great business opportunity.
